EXPERIENCE

SYSTEM ENGINEER (FULL STACK DEVELOPER)

Tata Consultancy Services, Chennai, India

2020-Present

- Developed highly visible web app for banking and financial services using Angular7, Node, TypeScript and backend interface with Java.
- In short span of time, implemented components such as Issuer Services, Corporate Action, Holders of Record, Shareholder Meeting which are some of the complex areas in share market.
- Worked closely with customers in a tight feedback loop to validate the analytics product offering.
- Built extensive test coverage for all new features which reduced the number of customer complaints.
- Worked within an agile team and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first.

PROJECT DETAILS

Project Title : Capital Marketing

Customer : TMX Group Limited

Role : Full Stack Developer

Technologies : Angular, Restful Services, Java and My SQL

Description : TCS had one product (Application) for Capital Market which long term debt or equity-backend securities are bought, sold and maintaining the shareholder details. This product has sold with more than 16 clients (TMX, EFI, KCC.. etc).
